OUR USER-FRIENDLY EQUIPMENT IS THE SOLUTION FOR CONTRACTORS WHO HANDLE THE REMOVAL OF PAINT STRIPE OR RUNWAY RUBBER, AS WELL AS, VARIOUS SURFACE PREP WORK PROJECTS.

WE OFFER THE FOLLOWING ADVANTAGES:

• Effective removal on both concrete and asphalt substrates
• Replaces grinders, planers, shot blasters and sandblasters that create ruts, troughs, scarring and damage to road surfaces
• Extremely high continuous production removal rates
• Competitively priced and cost effective
• Highest vacuum quality in the industry
• No chemicals or abrasives
• Self-contained water supply with low water consumption
• Dual head assembly: side by side or tandem configuration
• Simple Solid State wiring: No PLC needed

THE GOLD STANDARD IN WATERBLASTING SOLUTIONS

Blasters Liquidator™ is a paint stripe and runway rubber removal system which utilizes ultra-high-pressure water equipment to safely remove roadway markings, airport runway markings and rubber buildup, curing compound, sealer and tack.

1. **Truck Mount Head Assembly**
   - Dual Head Assembly

2. **Hydraulic System**
   - Operates water boost pump, engages PTO, controls arm assembly and rotation of cleaning head.

3. **Caterpillar C-9 Engine**

4. **Vacuum System**
   - 1,400 CFM (2,378 m³/hr) with filtration bag house.

5. **Water Blasting System**
   - Hammelmann pump. 40,000PSI @ 12GPM (2,750BAR @ 45.4LPM), Blaster filtration: 1 micron bag filter / cartridge filter. Proven design.

6. **Water Tank**
   - 2,250gal (11,250ltr). Custom built, lightweight welded poly. Low water level sight gauge.

7. **Patented Debris Tank**
   - 2,250gal (11,250ltr). Steel construction w/ epoxy paint. Patented, slant floor design.

**Peterbilt 520 Cab-over Truck**
- Up to 64,000GVW (29,090kg).

**L4012VT**

**L4012VK**

**L4009MVK**

**TRUCK MOUNT SPECIFICATIONS**
- Cleaning Paths: up to 36”
- Hand held remote for infinite overhead/width positioning
- Simple design allows for quick change of spray bar and shroud configurations
- Hydraulically powered for ease of inspection, maintenance and operation
- Up to 24” of reach outside of truck bumper on either side

**KUBOTA TRACTOR**
- 25hp 3 cylinder diesel engine
- Single pedal hydrostatic transmission
- Rear gear range of 0-11mph forward speed
- Power hydrostatic steering
- Back-up alarm and safety strobe
- Cruise control

**NOTES**
- ROAD MARKING REMOVAL
- RUNWAY RUBBER REMOVAL
- CURING COMPOUND REMOVAL
- SURFACE PREP
- PAINT CLEANING AND REJUVENATION
- AIRPORT APRON CLEANING
- RETEXTURING

**CUSTOMIZABLE RUNWAY & PAVEMENT MARKINGS REMOVAL SYSTEM**

**TRACTOR SPECIFICATIONS**
- 25hp 3 cylinder diesel engine
- Single pedal hydrostatic transmission
- Rear gear range of 0-11mph forward speed
- Power hydrostatic steering
- Back-up alarm and safety strobe
- Cruise control
